

ACTIVITY

Based on a web site that already exists

Visit [Peep Family Science](#) to learn about this **free at-home science program for families of preschool children**. Watch the introductory 3-minute video to see concrete examples of what is available and how it is used. Then download the four free apps to help you work with your children to do hands-on science experiments to explore ramps, colors, sounds, and shadows. PEEP Family Science is available in English and Spanish, too.

Every app begins with a short parent video to give you tips on how to engage your child in the activities. Each of the four themes (apps) includes a variety of 10-15 minute activities that are easy to do at home with simple materials. More short cartoons intended for young children are included to promote their interest and engagement in each of the topics. For example, here are some of our favorites in each app:

- **Colors App:** A Peep of a Different Color (Video) and Color Hunt (Activity)
- **Ramps App:** Marble Mover (Video) and Ramps and Turns (Activity)
- **Shadows App:** Bringing Spring (Video) and Shadow Puppets (Activity)

- **Sounds App:** Chirp, Chirp, Tweet, Tweet, Chirp (Video) and Making Maracas (Activity)

Grade Level: Pre-K
